EDUCATION

VSB College of Engineering Technical Campus, Coimbatore

Electronics and Communication
Engineering

CGPA: 8.74 | 2023 – 2027

Government Girls Higher Secondary School, Madukkur

Higher Secondary Education
(12th Grade)

Percentage: 83% | 2022 – 2023

SKILLS

- Programming Languages:
Java (Basic),HTML, CSS,
React.js
- Tools & Platforms:
Visual Studio Code,Git,GitHub,
Canva, Arduino IDE
- Soft Skills:
Communication, Teamwork,
Problem Solving

CERTIFICATION

- Basics of Embedded Systems –
Emglitz Technologies
- VLSI Digital Design: Chip Design and
Verilog Programming – Infosys
Springboard
- IoT Edge Computing and IoT
Analytics – Infosys Springboard
- Static Web Development – Qbatzclay

OBJECTIVE

Electronics and Communication Engineering student with hands-on experience in Embedded Systems, IoT, Arduino, ESP32, and Web Development. Skilled in developing hardware-software integrated solutions and responsive web applications. Passionate about applying technical knowledge and problem-solving abilities to real-world engineering challenges.

PROJECTS

Jewellery Website (Frontend Development)

- Designed and developed a responsive jewellery website using React
 - Created dynamic product listings and reusable UI components
 - Implemented navigation and interactive product display features
 - Ensured responsive design using HTML, CSS, and JavaScript
 - Improved user experience with clean layout and structured components
- Tech Stack: React, HTML, CSS, JavaScript

Fire Fighting Robot

- Developed an ESP32-based Fire Fighting Robot to detect and extinguish fires automatically.
 - Used flame sensors to identify fire and DC motors for robot movement.
 - Integrated a water pump and relay module to suppress the detected fire.
- Tech Stack: ESP32, Flame Sensor, L298N Motor Driver, DC Motors, Relay Module, Water Pump, Arduino IDE (C).

INTERNSHIPS

Embedded Systems Intern(Emglitz Technologies)

- Implemented basic embedded applications using microcontrollers and sensor interfacing
- Applied hardware–software integration concepts through guided mini-projects

Web Development Intern(Qbatzclay)

- Built responsive web pages using HTML, CSS, and JavaScript
- Developed structured front-end components to enhance user interface and usability

PATENTS

Development of Fire Safeguard Emergency Robot with GPS

- Designed a fire safety robot with GPS-based real-time location tracking for emergency response
- Integrated embedded control, mobility, and wireless communication for operation in hazardous environments

Wastewater Treatment using Electrocoagulation

- Proposed an electrocoagulation-based system to remove contaminants from wastewater
- Developed a low-cost and efficient solution suitable for small-scale industrial and domestic use
